

# NIAGARA COUNTER TOPS

## TYPES OF FINISHED ENDS

**F - FINISHED END**

A STANDARD LAMINATED FINISHED END IS ONE WITH A 3/4" BUILDUP STICK BEHIND IT. THE END IS FLUSH WITH THE BOTTOM OF THE FRONT ROLL

**FC - FINISHED CORE**

A FINISHED CORE END FOLLOWS THE CONTOUR OF THE COUNTER TOP. IT IS USED WHEN THERE IS NO ROOM FOR A OVERHANG AND BLOCKING CANNOT BE USED

**FF - FINISH FLUSH END - THIS TYPE OF END IS THE SAME AS A STANDARD FINISHED END WITH THE ABSENCE OF THE BUILD UP STICK. THE LAMINATE CAN BE EASILY BROKEN BECAUSE THERE IS NO SUPPORT BEHIND IT. PLEASE BE CAREFUL USING THIS TYPE OF FINISHED END.**
